

PAKISTAN ATOMIC ENERGY COMMISSION

NUCLEAR SAFETY POLICY

Pakistan Atomic Energy Commission (PAEC) has national role in developing and maintaining scientific and technological bases for safe use of nuclear energy. It is the policy of PAEC to carry out operations of nuclear facilities without causing any additional risk to the health and safety of the general public and the workers. PAEC pledges strong adherence to the principle of As Low As Reasonably Achievable (ALARA) in exposure to ionizing radiation. PAEC undertakes provision of ample financial, technical resources and qualified / skilled manpower for the safe operation of its nuclear and radiation facilities. PAEC is committed to keep nuclear safety pragmatically an overriding priority among all considerations.
