

TYPING INSTRUCTIONS FOR PREPARING FLOPPY DISKETTES

1. Text should be typed in 'MS Word 97 – MS Word 2002'.
2. Type main heading (title of the paper with capital letters, e.g.
**ON THE DETERMINATION OF REACTION PRODUCT PARAMETERS
USING MUSCOVITE MICA**
3. Type the name & address of the author(s) in the following format :
N.A. KHAN, H.A. KHAN, K. GUL and R.A. AKBER
Pakistan Institute of Nuclear Science & Technology (PINSTECH), Islamabad, Pakistan
E-mail address of the corresponding author.
4. Type the abstract in one paragraph without any format, for example :
Two independent methods have been described and discussed for the determination of reaction product parameters using Muscovite mica track detectors. The first method is based on the experimentally obtained calibration curves for apparent track etch velocity versus residual range in Muscovite mica (with upto 6 Keywords).
5. Type headings of the major section with the following style :
1. Introduction
6. The sub-heading should be typed as :
2.1. Apparent etching velocity vs residual range
7. Type the text of the paper without any format with single line spacing.
8. The equations should be typed using Microsoft Equation Editor Version 3.0 of the 'M.S. Word'.
9. Tables should be typed in a separate file, using M.S. Word 'table' option.
10. Figures should be on a separate file. It is to be ensured that the lines are thick enough to be reproduced conveniently after size reduction as required at the stage of composing.
11. Use square brackets for references in the text.
12. Type the references with following format (authors' name, title of the journal, volume no., year of publication and page no.):
[1] R.L. Fleischer, P.B. Price and R.M. Walker, Ann. Rev. Nucl. Sci., **15** (1965) 1.
